

# Affordable Data Protection

A **Simple** Way to Manage IT.

## Enterprise Class Cloud Backup

AllianceVault offers file based backup of PC's and Servers and image level backup of servers with the highest level of reliability, speed, and security. In addition, our Continuous Data Protection feature backs up files as soon as a change is detected.

## Backup Everything!

AllianceVault offers file based backup of PC's and Servers and image level backup of servers. In addition, you can also backup mobile devices such as iPhones and iPads.

## More Reliable

Unlike most services, AllianceVault ServerSave creates transactionally consistent bare metal images of servers to ensure the image has no data corruption. Unlike tape backup, restoring data is fast and reliable.

## Security and Compliance

AllianceVault is compliant with HIPAA, SSAE 16, Sarbanes-Oxley, PCI, and US EU SafeHarbor. Unlimited Versioning and Unlimited file archiving are included in AllianceVault.

## Built in Local Backup

With AllianceVault's local backup system, you can backup your most important files with encryption to an external USB drive or a local network connection. It also eliminates the need for expensive backup software.

## Unlimited Version Archive

Keep an unlimited version history of all your files. Use our time machine feature to go back to the date you want to restore your backup as of and recover that snapshot of files & versions.

AllianceVault protects your vulnerable and valuable business data from human error and disaster. In addition, AllianceVault replaces archaic and unreliable backup solutions such as tape.

**Forty Percent of businesses do not reopen after a disaster and over 90% fail within two years after being struck by a disaster.**

In a nutshell, AllianceVault protects one of your most valuable assets, your data.
